**RE: New End-Use-Product Registration
Engenia herbicide (EPA Reg. No. 7969-XXX)**

Dear Ms. Schmid:

BASF is submitting a new registration submission for Engenia herbicide (7969-XXX), based on the existing product registration database for the previously registered Engenia herbicide (7969-345). No new data is being submitted with this registration action, but since EFED review of previously submitted data under the previous Engenia herbicide registration is ongoing a PRIA R320 action is being requested.

The proposed labeling that is being submitted in support of this action is identical to the most recently approved Engenia herbicide (7969-345) labeling, with the exception of the EPA Registration Number being deleted and one use rate correction in the Sugarcane Use Directions on page 27 where the 12.8 fluid oz/A rate was incorreccted translated into 1.0 lb dicambaA instead of the correct 0.5 lb dicamba/A. That error has been corrected.

This is a PRIA R320 action with a fee of \$13,888. This PRIA fee is to be paid using the existing BASF PRIA fee credit. Please use Payment ID reference **265OOL5U-B, Company Number 7969**.

Included with the administrative documents are the following:

- EPA Application form 8570-1
- Proposed Engenia herbicide label
- Internal and public data matrix for Engenia herbicide and Dicamba Technical
- Certificate with respect to citation of data forms for Engenia herbicide and Dicamba Technical
- Basic and Alternate CSFs for Engenia herbicide

Thank you for your assistance with this matter. If you should have any questions, please feel free to call me at (919) 547-2622.

Regards,

Jeffrey H. Birk, Ph.D.
